High-pressure Check valve

Nominal diameter options (inch) 1/4" - 2"

Nominal pressure options (PN) 200-250

Maximum working temperature depends on the material

FEATURES

- For liquids, gases and steam.
- For use in hydraulic, pneumatic, heating and steam systems, chemical and food industries, etc.
- Spring operated piston closure.
- Reduced pitch.
- Avoids ram shock when closing at zero pressure, remaining completely watertight at the time of fluid reversion.
- Highly tightness, exceeding the requirements of EN 12266-1.
- Easily assembled in any position in accordance with the direction of the fluid flow. Without spring only for horizontal mounting.
- Fully constructed from laminated bars.

In accordance with the requirements of directive 97/23/EC

MATERIALS AND PARTS

N°. PIECE	PIECE	MATERIAL										
		BRASS			CARBON STEEL				STAINLESS STEEL			
1	Body	Brass (EN-CW617N)			Carbon steel (EN-1.1191)				Stainless steel (EN-1.4401)			
2	Cap	Brass (EN-CW617N)			Carbon steel (EN-1.1191)				Stainless steel (EN-1.4401)			
3	Piston	Stainless steel (EN-1.4401)			Stainless steel (EN-1.4401)				Stainless steel (EN-1.4401)			
4	Spring	Stainless steel (EN-1.4571)			Stainless steel (EN-1.4571)				Stainless steel (EN-1.4571)			
DN		1/4" to 2" (GAS, NPT or SW)

- (1) For other mounting positions, with or without spring, the flow coefficient varies by ± 2%.
- (2) Flow coefficient for orientation. The volumetric flows which cause loss of pressure to 0,07 bar = 1 Psi are in unstable areas (See diagram of pressure loss).
- (3) Opening pressures are greater than 0,007 bar = 1 Psi. The Cv coefficient cannot be determined.

Load losses

The adjoining diagram reflects the load loss curves for water at 20°C. Values are based on valves without springs and installed horizontally. In order to determine other fluids load losses, calculate the flow of these equivalent to water.

$$Q_A = \sqrt{\frac{\rho}{1.000}} \cdot Q$$

Q_A = Flow equivalent to water in m³/h.

ρ = Fluid density in operating conditions in Kg/m³.

Q = Fluid flow in operating conditions in m³/h.
